

### Systems Quiz

1. Draw the graph of each of the following equations using any of the following procedures:  
(table of values, x & y intercepts or point slope)

$$4x + y = -8$$

$$2x - 3y = 6$$

2. Solve each of the following systems by the indicated method:

- a) addition and subtraction

$$4x + 2y = 18$$

$$5x - 4y = 3$$

- b) substitution

$$-2x + 3y = -5$$

$$5x - 3y = 17$$
